Keep it clean

A machine that can automatically deep clean escalators in minutes

Rosemor International was established in 1985, specialising in the manufacture and supply of precision-engineered automatic escalator cleaning equipment. Now the company provides second-to-none industry expertise in the cleaning equipment market. It is committed to offering its customers industry-leading products and systems, supported with expert advice and service. The company is excited to be attending many exhibitions this year, including Clean India Pulire 2011 and Pulire 2011 in Verona, where it will exhibit its innovative automatic escalator deep cleaning machine – Rotomac.

The Rotomac is the only machine in the world that has been built to clean the horizontal and vertical parts of an escalator step simultaneously. This machine has already proved to be successful and has been supplied, in addition to the Rotofast 560, to over 35 countries worldwide, including most of Europe, the USA, China, South Africa, Trinidad, Singapore and Australia.

The Rotomac 360 and Rotofast 560 have been built, designed and manufactured by aircraft engineers using aircraft materials.

ABOVE
The Rotomac 360 and Rotofast 560 can deep clean escalators and travelators within minutes

The machines have been designed by aircraft engineers

Rosemor's machines are being used in airports, railways stations, metro stations, shops, shopping centres and many other locations around the world.

The company has earned its reputation by supplying all major airports in the UK, escalator and travelator manufacturers, major cleaning contractors, such as ISS, OCS and Mitie, and public service provider Amey. This has enabled it to expand not only nationwide but also globally.

Rosemor's products have been tested and officially endorsed by the world's leading manufacturers. They enable dramatic cost savings compared with conventional cleaning methods and they clean the step and riser of the escalator right to the edges. There is no need to remove steps, as the cleaning is done in-situ so that overnight cleaning can be carried out ensuring that the escalator is ready for traffic at the start of the day.

The Rotomac 360 and Rotofast 560 can

also efficiently and effectively remove grease, spillage's, stones, foreign objects, hardened sand and grinding paste (spillage combined with grease). They will not dilute the lubrication of the escalator mechanism, and they can eliminate the danger of chains rusting, motors burning out and damage to the electrical circuits of the escalators. In addition, premises with clean escalators are more appealing, therefore attract more trade and develop a better reputation.

The travelator/escalator cleaning machines deep clean within minutes. The Rotofast 560 deep cleans and dries travelator or escalator steps to a refurbished appearance. The Rotofast quickly removes years of heavy dirt, leaving the surfaces looking like new.

By simply connecting to the mains, the Rotofast is ready to deep clean a moving escalator or travelator. The cleaning process is extremely simple for users – the brakes are applied, the key turned and a button pressed.

Four counter-rotating brushes reach deep into the grooves achieving results never before realised in this field. A powerful vortex recovery system provides the suction leaving the surface 100% dry and ready for immediate use. As a result of the machine's speed and high performance, there is no longer a need to clean out of hours or close escalators or travelators for long periods of time.

Rosemor considers it extremely important that its customers use the machines safely and achieve optimum results, with minimum expense. Full and extensive training courses are offered to ensure that operators are confident and that maximum results are achieved. Company trainers travel worldwide to train teaching operators, distributors, managers and engineers, so that they have the know-how to use Rosemor's machines and how to maintain them independently. The company also offers refresher courses to ensure new and existing employees share the knowledge. It considers communication key to its success with its customers.

Rosemor also supplies its customers with a choice of many other machines, such as pressure washers, vacuums, steam machines, carpet cleaners, scrubber driers and sweepers. It will also build machines specifically to its customers' needs and requirements. The pace of change at Rosemor International is phenomenal and each product is developed

Communication with clients is key to Rosemor's success

BELOW
The Rotomac 360 has been featured on the UK's ITV news as a machine that has taken escalator cleaning into the 21st century. The programme commented that the Rotomac is "quite a crowd puller".

and adapted regularly to update to the needs of the market.

Rosemor's customer feedback speaks for itself. Greg Rice, service delivery manager at Chapelfield Shopping Centre in Norwich, UK, said: "The Rotomac has been very effective and efficient in cleaning the Otis escalators here over the last four years. We strongly recommend the Rotomac and maintenance services provided by Rosemor. <<<

Rosemor International Ltd... Experts and Specialists in Escalator Cleaning Machines...

Ask Yourself...

- Are you adapting your machine, cleaning offsite or manually cleaning the escalator step risers?
- Are your escalators hygienically clean?
- Does the appearance of your escalators add value to your business?
- What are the cross contamination risks?
- What damage is caused to your escalators by grinding paste of dirt and grease build-up?
- Can you afford to replace your escalators?
- Are your maintenance costs controlled?
- Do you have a value added maintenance programmes in place?
- When were your escalators last deep cleaned?
- Can your escalators be cleaned overnight without down time and traffic flow disruption?

There is only one solution..... The Rotomac 360!

The first and only Escalator deep cleaning machine in the world, that automatically deep cleans the vertical and horizontal part of an escalator step, simultaneously. Bringing your escalator back to an 'as new' appearance!
