

Rosemor celebrated its 25th anniversary

25 years of Rosemor Rotomac 360 will be released in May

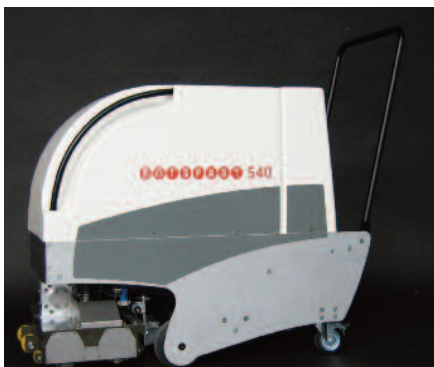

Rosemor International Ltd specialises in the manufacturing and supply of precision-engineered automatic escalator cleaning equipment and provides second to none industry expertise in the cleaning equipment market. Rosemor is committed to offering its customers industry-leading products and systems supported with expert advice and service.

Rosemor is very excited to be attending the InterClean exhibition in Amsterdam as they have done in previous years. However, this year not only is it their 25th anniversary, but they will also be launching a new product to their escalator range. The new product is designed especially for cleaning escalators. The Rotomac is the only machine in the world built to clean the horizontal and vertical part of an escalator step simultaneously. They have already proved to be successful with this machine supplying over 35 countries worldwide and currently most of Europe, USA, China, Trinidad, Singapore, Australia etc, are using their Rotomac 340 (previous model). The InterClean exhibition will be the first time their new product will be seen, The Rotomac 360.

The Rotomac 360 has a new side cover with an additional hole on the side to be able to change the wiper brush without removing the tray. This makes it easier for the operator to clean the machine, reducing time, therefore costs. The efficiency of the cycles on the machine has increased therefore more cleaning takes place within the set times, reducing further costs. This is very useful for extremely dirty escalators. The software has also advanced so that the chain is longer lasting. The new model being released in May 2010 the Rotomac 360 is built with the same concept as the Rotomac 340, designed and manufactured by aircraft engineers, Rosemor's machines are being used in airports, railway stations, Metro stations, stores, shopping centres and ma-

ny other locations. Their reputation for supplying all major airports in the UK, Escalator and Travellator manufacturers, major Cleaning Contractors such as ISS, Mitie, and Amey etc has enabled them to expand not only nationwide but also globally. Only recently they have supplied equipment to Westfield Shopping Centre in London and Derby and also to Heathrow Terminal 5. Rosemor has built strong relationships with distributors abroad to in order to utilise their knowledge of the targeted markets, and they still are looking for many more distributors worldwide. They hope to broaden this customer/distributor base at the exhibition and meet existing distributors and customers.
