

Rotofast 540

Travellator / Escalator automatic deep cleaning machine

Thorough cleaning for optimal results

Rotofast 540

Travellator / Escalator automatic deep cleaning machine

The compact **Rotofast 540** delivers fast, thorough and right up-to-the-edge cleaning on moving travelators – naturally, without interfering with the travelator. Optimal cleaning results are achieved through the application of special contra-rotating brushes and patented vacuum recovery system.

The **Rotofast 540** can be used to dry clean, or to wet clean travelators through the application of a cleaning solution. The powerful integrated vacuum recovery system prevents any solution from entering the travelator shaft (the electronics and mechanics) and allows for safe and trouble free cleaning.

The **Rotofast 540** cleans right up to the edge and tackles the normally difficult to clean areas on travelators from recognized manufacturers.

Quick overview of advantages:

- fast cleaning results on all recognized travelators
- up-to-the-edge cleaning on moving travelators
- excellent cleaning results
- tackles the most stubborn dirt
- powerful recovery system – virtually removes all solution from the steps
- highly efficient
- excellent price/performance ratio
- special contra-rotating brushes
- specially developed cleaning solution
- easily transported
- compact design

See for yourself!

Simple to operate achieving excellent cleaning results!
