

escalator/ travelator

Rosemor International Ltd

You won't believe your eyes !!

For the first time in the world an automatic deep cleaning escalator/travelator machine that operates independently!

The compact Rotofast 540 delivers fast, thorough and right up-to-the-edge cleaning on moving escalator/travelators, without interfering with the escalator/travelators. Optimal cleaning results are achieved through the application of special contra-rotating brushes and a patented vacuum recovery system, designed by aircraft engineers.

The Rotofast 540 can be used to dry clean, or wet clean escalator/travelators through the application of a cleaning solution. The powerful integrated vacuum recovery system prevents any solution from entering the escalator/travelator deep shaft, and allows for safe and trouble free cleaning.

The normally difficult to clean areas which leading manufacturers have identified are tackled successfully by the Rotofast 540, resulting in an enhanced, 'as new' appearance.

Quick overview of advantages:

- Thoroughly scrubs and dries simultaneously, leaving the travelator or escalator ready to be used in minutes.
- Approved by all major escalator and travelator manufacturers providing complete peace of mind.
- Operators can select and engage any of the 3 automatic clean and dry cycles on the control panel with just one finger. Ensuring simple, flexible and fast operation.
- Once a programme is selected, the machine can be operated independently, meaning no operator is needed!!
- One compact, complete unit - Incorporating a powerful vacuum and efficient brush, this ensures it is easy to manoeuvre.
- The powerful vortex recovery suction system ensures steps are completely dry and immediately ready for use, ensuring there is no disruption on site.
- Up to the edge cleaning on moving travelators, ensures thorough cleaning.
- 4 specially designed contra-rotating brushes penetrate deep into the grooves to achieve excellent cleaning results, unparalleled in this field!
- Tackles the most stubborn dirt
- Excellent price to performance ratio
- Easily transported, safe and ready to use

Simple to operate achieving excellent cleaning results!
